

## DEDICATED CLIMBING CENTRES

Rockworks have extensive knowledge of every stage involved in the planning, design and site installation of a dedicated, commercial climbing centre.

Our impressive portfolio of completed projects include The Castle (London), Awesome Walls – Liverpool, Stockport, Sheffield and Dublin, Glasgow Climbing Centre, Newcastle Climbing Centre and many others.

Rockworks are owner/operators of both Newcastle and Sunderland Climbing Centres and therefore we are also well placed to provide consultancy and advice on business planning and operational management at the earliest stages

Many contemporary climbing centres are providing a more diverse range of activities to their customers and Rockworks have the expertise to install additional elements such as caving systems and high ropes courses
