

## THE CRAG

**Free standing climbing structure** – Designed to include a range of features and angles allowing for progression and challenge throughout.

**Construction** – Rockworks Realform climbing surface throughout. Resinous concrete on a G.R.P laminate base with integral supporting framework in galvanised steel, suitable for an outdoor environment.

**Structural design to EN 12572** (artificial climbing structures – protection points, stability requirements and test methods).

**Climbing potential** – 10 x individual route lines provided, fully equipped for lead and top roped climbing. 2 x graded climbing routes to each line – 20 individual climbing routes provided.

### Dimensions

Extent of base 5.30m  
Max. height 7.50m  
Average width 1.50m
