

THE GEO BOULDER

A climbing boulder specifically designed for playground environments and based on the shapes and features of a natural sandstone formation. The strong strata lines create accessible climbing ledges and the structure also incorporates a range of replica fossils for added educational value.

- Max. height – 2.0m
- Max width – 1.5m
- Overall length – 3.0m
- Conforms to EN 1176
- Construction in GRP
- Tough resinous concrete skin
- Weight – 256kg
