

SCHOOL CLIMBING WALLS

Climbing is a great way to get children engaged in sport and our climbing walls and structures can be designed to appeal to all age groups and abilities

Rockworks design and supply a wide range of school climbing facilities from playground traversing walls and outdoor play boulders to indoor roped walls

Climbing helps to develop physical co-ordination, communication skills, team building and self confidence

The climbing walls can be designed to integrate climbing into the GCSE PE and the *NICAS curriculum

We provide a complete design, installation and staff training package for every school climbing facility

Annual safety inspections are available and the climbing walls are designed, installed and tested to the requirements of the European standard EN 12572
