

SHELL CONCRETE sprayed & carved

- Highly naturalistic climbing structures are created that can recreate any rock type or style of climbing.
- Designs available for adventure playgrounds, schools and public parks
- Hand carved finish provides detailed climbing holds and features.
- Unique construction technique means that designs can be adjusted during the construction process.
- Natural rock and/or bolt on holds can be added for increased variety
- Ground works and safety surfacing options provided
- A highly durable, all weather outdoor system
- System designed in accordance with the European Standard for Artificial Climbing Structures EN 12572
- The design and construction of the climbing boulders is compliant with European playground standards
