SCHOOL CLIMBING WALLS

Climbing is a great way to get children engaged in sport and our climbing walls and structures can be designed to appeal to all age groups and abilities. Climbing helps to develop physical co-ordination, communication skills, team building and self-confidence.

Rockworks design and supply a wide range of school climbing facilities from playground traversing walls and outdoor play boulders to indoor roped climbing walls.

All facilities are designed and constructed to the highest safety standards.

TRAVERSE WALLS & CLIMBING BOULDERS

Low height climbing walls that don't require a rope or harnesses.

Traverse walls are provided with graded climbs using distinctive coloured holds and can be installed in virtually any location both internally and externally.

Playground boulders are also ideal for any play environment and designed to provide fun and adventure. The boulders can be combined with roped climbing nets and slack lines to create a challenging, interactive play environment.

The design and construction of the play boulders and traverse walls is compliant with BS EN Playground standards.

ROPED CLIMBING WALLS

Usually a minimum of 6.0m -7.0m in height for effective use, roped climbing walls are designed to offer both accessibility and challenge to all ages and abilities.

The climbing walls are equipped for both top rope and lead climbing and the climbing walls are designed to integrate climbing into the GCSE PE and the National Indoor Climbing Achievement Scheme (NICAS) curriculum.

Often installed into multi-activity sports halls, the climbing wall can be fitted with a hinged safety matting system that will prevent unauthorized access when not in use.

We provide a complete design, installation and staff training package for every school project

Annual safety inspections are available for all facilities and the climbing walls are designed and tested to the requirements of the international safety standard BS EN 12572.

If you wish to discuss the development of a climbing facility please contact our project team:
info@rockworks.co.uk | Tel : 01207 281 777.

We will be pleased to discuss the options available and to develop design proposals to suit your requirements.
